Project Outline

The primary objective of the project is to create a mobile-based healthcare application, which provides a faster, user-friendly and secure way to connect the bridge between physicians and patients worldwide. The main features of the project include booking appointment, consultation, over the counter medicine, book lab tests and keep medical records handy.

That being said, the project will focus on planning, managing, change control and other required services that will cater to the needs of the user.

Project Content

- SWOT analysis
- Scope statement
- Project charter
- Responsibility Assignment Matrix (RAM)
- Work Breakdown Structure (WBS)
- Gantt chart
- Risk register
- Probability Impact Matrix
- Change Management
- Quality metrics and Quality check list
- Quality control plan
- Lessons learned

Project Timeframe

Phase	Description of Work	Estimated Timeframe
Phase One	Brainstorming of the project and preparation of proposal	January 28 to February 2
Phase Two	Design and Implementation	February 3 to February 28
Phase Three	Execution and Quality Management	March 1 to March 15
Phase Four	Evaluation and documentation	March 16 to March 30

Project Budget

Phase	Work Involved	Estimated Costs (In CAD)
Phase One	Project Proposal and Requirement Gathering	3000.00
Phase Two	Server fee and Developer Funding	7000.00
Phase Three	Testing and maintenance fee	3000.00
Phase Four	Marketing and promotion cost	2000.00
	Total	15000.00

Note: The projected phase, time and cost are subject to change during the project tenure.
